PROFESSIONAL SUMMARY

Frontend-focused **Software Engineer** with 3+ years of experience building responsive, scalable web applications using **React, TypeScript, and Next.js**. Skilled in developing data-driven, user-friendly interfaces, integrating REST APIs, and delivering accessible, SEO-optimised experiences. Experienced working in **Agile/Scrum environments**, with a solid foundation in unit and end-to-end testing, version control, and CI/CD-driven delivery. Comfortable collaborating with designers, backend engineers, and stakeholders to translate requirements into polished, production-quality software.

KEY SKILLS

- **Frontend Development**: React.js, **Next.js** (incl. **Vite**), JavaScript, TypeScript, HTML, CSS, **Tailwind CSS**
- **State Management**: Redux, Redux-Toolkit, Apollo GraphQL, Zustand
- **APIs & Backend**: REST APIs, GraphQL, JSON handling, authentication flows
- **Data Visualisation & UI**: building interactive, data-driven interfaces; Figma-to-UI conversion; responsive design; accessibility; SEO best practices
- **Delivery & Quality**: **Agile/Scrum** ceremonies, **unit and E2E testing** fundamentals, Git/GitHub, CI/CD pipelines, JIRA, Trello
- **Deployment**: Vercel, Netlify, Heroku, AWS-hosted applications
- **Additional**: React Native, Node.js, Python

PROFESSIONAL EXPERIENCE

Frontend Engineer — Freelance (Self-Employed) Mar 2024 – Present

- Independently manage the full development lifecycle — architecture, build, testing, and deployment — for international and local clients, working directly with stakeholders to translate requirements into working software.
- **Bridge Finance & Mortgage**: developed a custom financial services platform using **Next.js** and Tailwind CSS, building responsive, optimised lead-capture tools and user journeys for a live client product.
- **Simnyx**: architected a corporate digital presence with a focus on clean, reusable UI components and consistent design patterns to support long-term scalability.
- **Dhaka Topi Khaja Ghar**: engineered a mobile-first restaurant ordering platform, achieving high Lighthouse performance scores and implementing SEO best practices to drive measurable local business growth.
- Used **Agile-style iterative delivery**, GitHub-based workflows, and CI/CD pipelines to ship production-quality releases on a recurring basis.

Frontend Engineer — Zebec HQ Feb 2022 – Mar 2024

- Built high-performance, **data-driven web applications** using React.js, **Next.js**, TypeScript, and Tailwind CSS for Zebec, a continuous settlement protocol on Solana, and Zebec Instant Card, enabling real-time crypto payments via BNB and USDC.
- Worked within **Agile/Scrum** delivery cycles alongside designers, backend engineers, and QA to ship seamless UI/UX across multiple live fintech products.
- Integrated **@solana/web3.js**, **REST/GraphQL APIs**, and Redux Toolkit to manage and visualise on-chain and off-chain blockchain data in real time.
- Contributed to **wallet integration flows** (including Phantom Wallet) and frontend-side smart contract interaction, translating complex blockchain logic into intuitive user interfaces.
- Optimised frontend performance, reducing average load time by **30%** and improving Lighthouse performance and accessibility scores.
- Conducted **code reviews**, contributed to frontend architecture decisions, and **mentored junior developers** on clean-code, testing, and documentation practices.

Frontend Developer — Intelzy Software Oct 2021 – Feb 2022

- Led frontend development of ICAS, an enterprise-level online billing system, taking ownership of the UI layer from design handoff through to release.
- Built responsive, mobile-first UI components using React.js, HTML5, and CSS3, prioritising performance and cross-device consistency.

- Collaborated closely with backend engineers to integrate **REST APIs**, ensuring fast, secure, and reliable data transactions for a high-volume billing system.
- Mentored junior developers on clean-code principles and reusable component patterns, helping establish consistent frontend standards across the team.

Frontend Developer — Pwnbot System Aug 2020 – Oct 2021

- Joined as an intern and progressed to a full-time developer role, contributing to 4+ production-grade web projects across React, Redux, and Vue.js.
- Improved performance and accessibility scores across multiple client websites through targeted refactoring, code optimisation, and testing.
- Participated in internal hackathons and frontend workshops, building foundational skills in JavaScript, UI development, and collaborative problem-solving under time pressure.

EDUCATION

Master of Information Systems Management Graduated 2025
Macquarie University — Macquarie Park, NSW

Bachelor of Science in Computer Science & IT (BSc. CSIT) Graduated 2021
Lumbini ICT Campus (Tribhuvan University) — Nawalpur, Nepal

Professional Year in Information Technology In progress, Oct 2026
Indus Institute of Technology and Education — Hobart, TAS

NOTABLE PROJECTS

- **Zebec Network**: continuous settlement protocol on Solana.
- **Zebec Card**: crypto debit card management portal built on BNB & Solana-based USDC.
- **Simnyx** & **WageLink**: corporate/institutional websites for a Nepal-based IT training institute.
- **Dhaka Topi Khaja Ghar & The Momo World**: mobile-first restaurant and food-ordering platforms.
